

Simplify the Way You Pay Medical Bills

Cockerell & McIntosh Pediatrics can now securely save your credit or debit card on file to cover any balance due after your insurance benefits are applied.

What are the benefits of the new program?

- Convenience – With a card securely saved on file, we process the payment for you automatically and send you the receipt via email. There is no need to write out a paper check or mail in a payment.
- Security – Because your card is saved on file, you will not receive an invoice in the mail. This eliminates your paper waste and the chances your personal information can be viewed or stolen by others.

How much will I be charged?

After your insurance coverage is assessed, you will be charged for any uncovered portion of your visit. A maximum charge limit can be established.

Will my credit or debit card be charged right away?

No, you will not be charged when you leave your card on file, nor will any funds be 'held' on your card. Once the procedure is complete and we have assessed your insurance coverage, you will be charged for any uncovered portion of your visit.

Is my credit or debit card information safe?

Our system is PCI Level One Certified, which is the highest level of security established by the Payment Card Industry Data Security Standard. Once your card is entered in the system, it will be encrypted and inaccessible to anyone who uses the program.
